KanaLocks

KL300-type

● Order No. Example

As the KL300-type is completely set up in a mounting space which is extremely small in the radial direction, it is possible to select up to 4 built-in KanaLocks. This also allows a large torque to be transmitted. Connection is made through a KL300S pressure flange. Boss hole and shaft fit is up to H8/h8.

 Special Structural Steel

Type	φd	φD	L	L1	Maximum Allowable Torque N·m	Weight g	¥
KL300	5	8	4.5	3.7	1.7	0.9	
	6	9			2.5	1.1	
	6.35	9.5			3.0	1.2	
	7	10			3.4	1.4	
	8	11			4.4	1.5	
	9	12	4.5	3.7	5.5	1.7	
	9.5	12.5			6.2	1.8	
	11	14			8.4	2.0	

Please refer to the KPL300-type on the next page for the intermediate dimensions.
