

Lubricant Oil for Food Machinery/Food Release Oil

● Order No. Example **Bio-Adnil 500-1P**

Name

* Bio-Adnil and High-Separe are products certified as "3H" by the NSF (NSF International) who took over the certification business of the USDA (U.S. Department of Agriculture) in 2001. The "H1" certified product is an oil which can be used in food processing plants, but cannot actually touch the food product itself. "3H" is an oil which can safely come into contact with the food product itself in food mold release.

◇ Bio-Adnil (lubricant oil for food machinery/food release oil) * Tasteless and odorless

● NSF Reg.No.123104

● NSF Reg.No.123105

Lubricant Oil for Food Machinery/Food Release Oil

◇High-Separe (food release oil) NSF Reg.No.131539 * Tasteless and odorless

* High-Separe is reliable/safe/versatile!! And more, it comes in a bargain big size.

NSF 3H Certificated Product

Neither the Flavor Nor Appearance Are Impaired At All

As High-Separe is a food release oil which has passed the NSF (NSF International) 3H, it can obviously be used in places where the food product is touched directly, but use of the product sprayed directly onto food products is also permitted.

It goes without saying that High-Separe is tasteless/odorless and that you need not be concerned about impairing the flavor or appearance of food products, principally as it is a food product packed with highly purified edible vegetable oil at a food processing factory.

550ml Folding Nozzle Type * 1 Case x 20 Units Included

Name	Internal Capacity	Quantity Contained	¥	Delivery
HAIPA550 High-Separe 1P	550ml	1 unit		●

Precautions

The expiration date is written on the container.
